

Muhammad Saad

Software Engineer

I am Muhammad Saad, a Computer Science graduate from FAST, Lahore, with extensive experience in blockchain development, AI systems, and web technologies. I have successfully managed projects like an AI Medical System, NFT Marketplace, and Ozone Accounting Marketplace, showcasing my skills in React JS, Solidity, and Python. I have also competed in notable tech competitions like Softec and NasCon.

Projects/Portfolio

AI Medical System

- Managed by integrating artificial intelligence into healthcare operations, featuring an AI doctor that interacts with patients, understands symptoms, and helps diagnose diseases.
- Frontend:** React JS **Backend:** Python

NFT Market Place And Minting Websites

- Developed by implementing React JS for the frontend and Solidity for smart contracts, allowing users to buy and sell NFTs via 3rd web.
- Frontend:** React JS **Backend:** Solidity

Ozone Accounting Marketplace

- Developed by creating an accounting marketplace with personalized accounts, Stripe integration, multiple functional pages.
- Frontend:** React JS **Backend:** Supabase

React-Face-Recognition

- Developed by using React JS and face-api.js for face detection and recognition, including age and gender prediction based on facial features.
- Frontend:** React JS **Backend:** Node.js

AI Chat Bot

- Managed by taking user input and generating responses using an AI model. The project utilizes an ANN model to process queries. **Frontend:** HTML, CSS, JavaScript **Backend:** Python

TECHNICAL SKILLS/TOOLS

TypeScript

HTML

JavaScript

CSS
